

## DuraVision™ Convex Mirror Product Sheet:

### Stainless Steel Wall Dome

The Unbreakable wall mounted dome gives 180 degrees of vision and is ideal for preventing surprise attacks and collisions in correctional facilities, mental health care units and vandal prone areas. The highly polished stainless steel face will resist repeated blows. This mirror works best in areas such as hallways, stairwells and visiting areas. The anti-ligature frame and hole design makes this mirror safe for use in high security areas. We recommend using an anti-pick sealant to secure the 16505C model with pressed counter-sunk holes.

#### Features

- .9mm 304 Stainless Steel mirror face
- The curve is designed to maximise the viewing area for added safety
- 7mm Plain or Counter-sunk holes to take security head fasteners
- Can be used with or without frame for anti-ligature applications, due to the unique hole design
- All parts of the mirror are flame proof and water proof

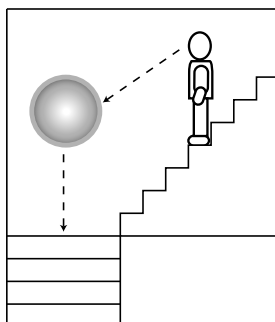

#### Suitable Uses

- Correctional facilities
- Mental health care units
- Stairwells and Corridors
- Vandal prone areas

#### Specifications

Code	Size	View Distance	Mirror Face	Holes	Frame
